
Simulated dynamics at the median of the sampled ranges, and across them — no fitted parameter
Model 2 (maintenance + temporal preparation)
Model 1 (maintenance only)
gated motor-preparatory signal
time from stimulus offset (s)
40 admissible parameter settings,
one trajectory each (50% coherence, 2 s)
signal, in units of the distance from θ to g
median of the ranges
coherence 0%
coherence 12%
coherence 50%
stimulus 0.3 s
stimulus 2.0 s
